

VACCIMO

VACCIMO: Vaccination and More. It is health alert system on SMS/CALL/E-MAL. With millions of mobile phones, the ability for enterprises to reach out to customers and other communities, has improved significantly. The mobile world has the advantages of instant reach.

The end user will receive the health alert as SMS and E-MAIL, 7 days before, 4 days before, 1 day before and on the due date. The call alerts will be on 2 days before and on the due day. The call alerts are automated; the system will make the call and read out the text.

Hospital Module:

General Hospital and Veterinary Hospitals can use this system.

General Hospital: can use the system to set VACCINATION alerts for child and general health check up alerts for everyone. In general health check up case it is reminder of the pre requested appointment. It will be great a ROI for specialists. Hospital can modify alert dates

Hospital's can define the vaccination set that suitable to their customers. Hospital can set these alerts from WEB or MOBILE.

We have exclusive mobile applications to set these health alerts. Admin and Co-admin's can set the health alerts from their mobiles. Hospital can define their assistance staff as co-administrator. This way attenders and nurses can set these alerts.

You can find more details about mobile applications [here](#)

If you have any question, Please do check our F.A.Q section [here](#).

We do provide API's to interact with existing hospital application. Our API are REST based API's. They are very easy to use. You can find more details at

The system will send the reminders to people in between 8AM and 10AM.

User Module:

General users also can set the alert from themselves.

You can select any vaccination set. These vaccination sets are defined by various hospitals and physicians. Based on the date of birth and selected vaccination, system will set the alerts automatically. You can also view health alerts set by various other hospitals using VACCIMO. If you feel particular vaccination set is missing, please mail us the details at support@numo.in we will add it to the database, so that other uses also can use this.

You need to sign up to use VACCIMO. As of now user's will get the reminders (set by user) on E-MAIL only. If hospital sets the alerts, you will get the reminders on SMS, CALL and E-MAIL.

We are not releasing this in this version. We are working with third parties to get free SMS. If not we will release paid version.

Mobile applications are powered by MobiTop of Mobisy. Voice is powered by TringMe.(Voice PHP).

What's Next?

As requested by few hospital's we are adding **medication alerts**.

According few doctors very less number of people completes the full course of medication. This way patients are not getting full benefits. Given busy schedules, the people in rural areas tend to forget the medication after their health is 50% normal. Apart from the health many of the valuable medicines getting wasted.

The tendency of forgetting the medication is very high in the old age people. These reminders will help them to complete the course.

If you have any suggestions and advices to this module please mail the same to tech@numo.in

Please feel free to connect us to your physician/pediatrician/dentist/veterinarian. Thank in advance...
